## English POWER HOUSE Toolkit

English POWER HOUSE Toolkit

As language does not represent a barrier in accessing information (key outputs of EC-funded projects are usually available at least in English), the National Housing Federation, as coordinator of the English POWER HOUSE Platform has encouraged its members to build up their own Toolkits in order to respond to their specific needs.

Furthermore, in addition to the Resources available on the POWER HOUSE EUROPE website, the National Housing Federation has provided key documents on its website (click [HERE](#) to access this information) to assist housing associations to finance retrofit and renewable energy projects.

Click [HERE](#) to access the Resource section and build up your tailor-made POWER HOUSE Toolkit.
