

Sweden

Having seen the different frameworks in which Municipal Housing Companies are working as opposed to Cooperative Housing, to better help their respective members in the challenges they are facing and better support the initiative they have already in place (see the “SABO Energy Challenge” and the “HSB Climate Strategy”), the two Swedish housing federations preferred to work independently by establishing the following POWER HOUSE Platforms:

- **SABO Platform - The Swedish Association of Municipal Companies**
- **HSB Platform - The Swedish Cooperative Housing Association**
