HSB's POWER HOUSE Toolkit

HSB's POWER HOUSE Toolkit

As language does not represent a huge barrier in accessing information (key outputs of EC-funded projects are usually available at least in English), HSB, as coordinator of the Swedish Cooperative Housing Association Platform has encouraged its members to build up their own Toolkits in order to respond to their specific needs.

Furthermore, in addition to the Resources available on the POWER HOUSE EUROPE website, HSB has provided key information on its website (click [HERE](#) to access this information) to assist Swedish cooperative housing associations to finance retrofit and renewable energy projects.

Click [HERE](#) to access the Resource section and build up your tailor-made POWER HOUSE Toolkit.
