POWER HOUSE nearly-Zero Energy Challenge is supported by the Intelligent Energy - Europe Programme (Grant Agreement n. IEE/11/007/SI2.615921)

The sole responsibility for the content of this website lies with the authors. It does not necessarily reflect the opinion of the European Communities. The European Commission is not responsible for any use that may be made of the information contained therein.

What is Intelligent Energy-Europe about?

Faced with unprecedented energy challenges, the European Union is committed to its "3 times 20 target" – 20% less greenhouse gases, 20% better energy efficiency, and a 20% share of renewables - to build a secure and cleaner energy future.

Intelligent Energy-Europe comes in support of these objectives by tackling the "softer" factors: removing market barriers, changing behaviour, creating a more favourable business environment for growing energy efficiency and renewables markets, and making EU energy policies better understood in Europe's communities and regions.
